SUMMARY

AI/ML Engineer passionate about applying artificial intelligence to **women's health, public health, and social impact**. Skilled in building **machine learning models, AI-driven prototypes, and data visualization** using Python, Scikit-learn, SQL, and Streamlit. Experienced in **collaborative, health-focused AI projects** through structured fellowships and driven by personal experiences in reproductive health.

SKILLS

Python • Scikit-learn • TensorFlow • SQL • Streamlit • Power BI • Plotly • Data Cleaning • AI Agents • Team Collaboration • Research Analysis • Report Writing

---

PROJECTS

FertiSight: AI-Assisted Fertility Prognosis (2025 – Formative Stage)

- Developing an AI-driven concept aimed at providing personalized reproductive health insights for African women.
- Currently focused on defining data sources, user needs, and culturally relevant frameworks to guide model design and validation.

CycleSense: AI for Reproductive Health (2025)

- Co-led conception, data sourcing, cleaning, ML modeling, and Streamlit app deployment.
- Built models assessing menstrual cycle stability using mean, standard deviation, and coefficient of variation.
- Provided actionable insights for personal users, clinicians, and researchers.

Scholarship Recommendation System (2025)

- Developed ML model to predict scholarship eligibility and optimize recommendation pipelines.
- Delivered interactive dashboards and reports to visualize candidate suitability.

Predictive Profitability Analysis (2024)

- Built regression models forecasting SME profitability; visualized insights via interactive dashboards.

AI Agent Experimentation (2025)

- Prototyped AI assistants using OpenAI/Gemini APIs with automated data pipelines.

PUBLICATIONS

- **Grain yield and weevil (Sitophilus zeamais Motsch.) resistant potential of 10 maize (Zea mays L.) varieties and their inter-varietal hybrids** (2019)
  Nigerian Journal of Genetics, 33:43–58

EXPERIENCE

AI Fellow – Women in AI Fellowship, Webfala Digital Skills for All Initiative *(Mar – Sep 2025)*

- Contributed to CycleSense project, integrating model building, data analysis, and app deployment.
- Collaborated in a multi-disciplinary team, enhancing research and mentorship skills.

Compliance Manager – Kwara Agriculture Network Ltd (KANL) *(Apr – Dec 2023)*

- Automated compliance and HR systems, improving efficiency and reporting accuracy.
- Built dashboards for data-driven decision-making.

Field Enumerator – FMARD, KwLTP *(2020 – 2021)*

- Supervised data collection from 5,000+ farmers; ensured high-quality datasets for government programs.

EDUCATION & CERTIFICATIONS

MSc, Agronomy (Plant Breeding) – University of Ilorin, 2018
B.Agric, Crop Protection & Environmental Biology – University of Ibadan, 2014

Women in AI Fellowship – Webfala Digital Skills for All Initiative, 2025
IBM Data Science Professional Certificate – Coursera, 2024
Women Techsters Bootcamp (Data Analysis) – Tech4Dev, 2024
