SUMMARY

Data Scientist with hands-on experience building machine learning models and data-driven solutions in health and business contexts. Skilled in Python, SQL, and data visualization, with a track record of developing end-to-end projects from data sourcing to deployment. Passionate about translating data into actionable insights that support decision-making and drive measurable outcomes.

SKILLS

Python • Scikit-learn • TensorFlow • SQL • Streamlit • Power BI • Plotly • Data Cleaning • AI Agents • Team Collaboration • Research Analysis • Report Writing

---

SELECTED DATA SCIENCE PROJECTS

CycleSense: Menstrual Cycle Classification & Fertility Insights

- Co-led development of an end-to-end ML framework using clustering and statistical features to classify menstrual cycle patterns and stability
- Applied K-Means clustering with evaluation metrics and integrated demographic overlays to generate interpretable fertility insights
- Deployed a Streamlit application enabling real-time classification and decision-support for users, clinicians, and researchers

Scholarship Recommendation System (NLP-Based)

- Built an NLP-based recommendation system using TF-IDF and cosine similarity combined with rule-based filters for accurate scholarship matching
- Cleaned and structured dataset (deadlines, duplicates, normalization) to improve recommendation quality and reliability
- Developed an interactive Streamlit app delivering ranked recommendations, reducing manual search effort

ChefAI: AI Cooking Assistant (LLM Application)

- Developed an AI-powered assistant using Google GenAI to generate structured, step-by-step cooking instructions
- Designed system prompts to ensure consistent, reliable output formatting and improve user guidance
- Implemented a modular, API-driven architecture demonstrating practical use of LLMs in instructional systems

---

PUBLICATIONS

- **Grain yield and weevil (Sitophilus zeamais Motsch.) resistant potential of 10 maize (Zea mays L.) varieties and their inter-varietal hybrids** (2019)
  Nigerian Journal of Genetics, 33:43–58

EXPERIENCE

AI Fellow – Women in AI Fellowship, Webfala Digital Skills for All Initiative *(Mar – Sep 2025)*

- Contributed to CycleSense project, integrating model building, data analysis, and app deployment
- Collaborated in a multi-disciplinary team, enhancing research and mentorship skills

Compliance Manager – Kwara Agriculture Network Ltd (KANL) *(Apr – Dec 2023)*

- Supported early-stage operational and compliance processes within a startup environment
- Assisted in organizing records and improving structure for reporting and internal coordination
- Gained exposure to data handling and administrative workflows in an emerging organization

Field Enumerator – FMARD, KwLTP *(2020 – 2021)*

- Supervised data collection from 5,000+ farmers; ensured high-quality datasets for government programs

---

EDUCATION & CERTIFICATIONS

MSc, Agronomy (Plant Breeding) – University of Ilorin, 2018
B.Agric, Crop Protection & Environmental Biology – University of Ibadan, 2014

Women in AI Fellowship – Webfala Digital Skills for All Initiative, 2025
IBM Data Science Professional Certificate – Coursera, 2024
Women Techsters Bootcamp (Data Analysis) – Tech4Dev, 2024
